

2006 **Additional Deer Hunting Opportunities**

Deer hunting opportunities have been increased to assist in reducing deer populations in areas of potential risk to chronic wasting disease (CWD):

WMU 234

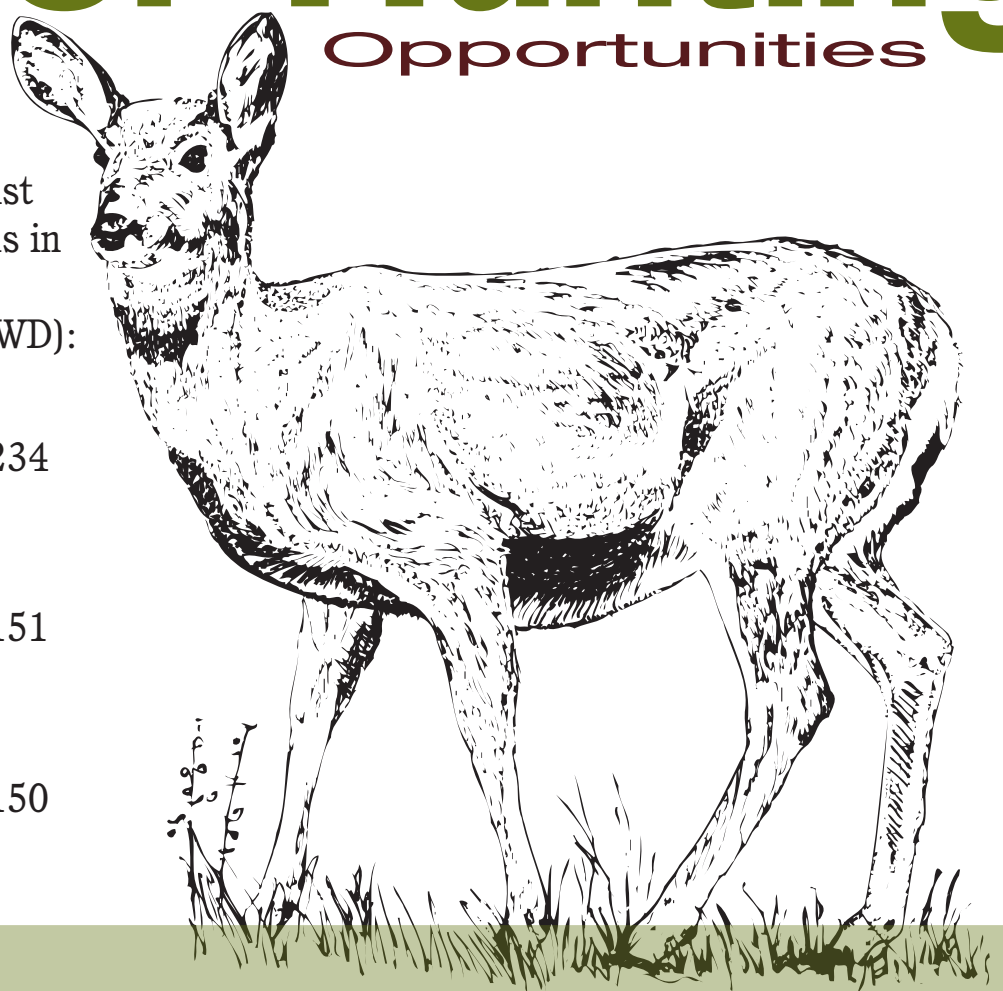

Only that portion of WMU 234 within Ranges 1 and 2

WMU 151

Only that portion of WMU 151 within Ranges 1 and 2

WMU 150

Only that portion of WMU 150 within Ranges 1 to 3

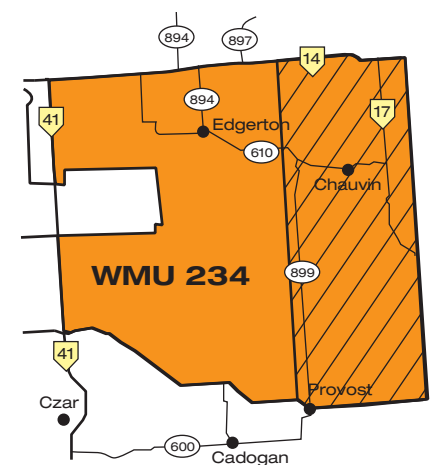

Licences for resident hunters are available through the under-subscribed licence system.

Landowners in the CWD control areas or their immediate family can apply for these licences through the local Fish and Wildlife office of Alberta Sustainable Resource Development— similar to existing landowner licence approvals.

Three tags are issued with each CWD quota licence. The first two tags are valid for 2 antlerless deer (either mule deer or white-tailed deer). The third tag can be used on any deer, but is not valid until the heads from the first two deer have been submitted to a Fish and Wildlife office. Licences cost \$9.00 plus GST.

WMU 234 CWD Control Area:

Archery season	September 6 - October 31
Rifle season	November 1 - December 20
Landowner season	November 1 - January 15

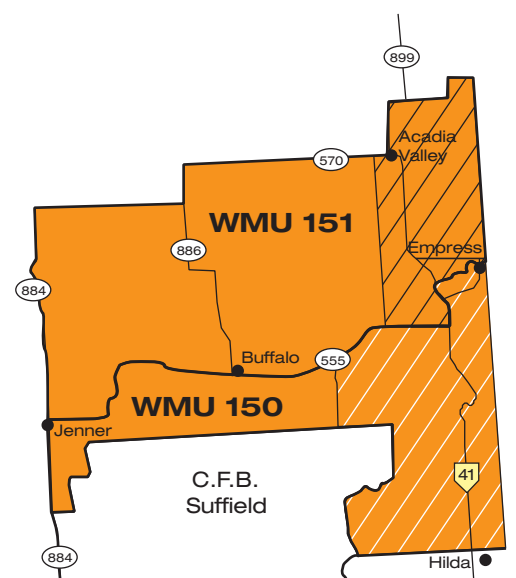

WMU 150 & 151 CWD Control Areas*:

Archery season	September 6 - October 31
Rifle season	November 1 - December 20
Landowner season	November 1 - January 15

* season open Monday to Saturday

- Chronic Wasting Disease Control Area - WMU 151 and 234
- Chronic Wasting Disease Control Area - WMU 150
- Wildlife Management Unit Boundary (WMU)

It is a mandatory requirement to submit the heads from all animals harvested in the CWD control areas for testing. Antlers and skull plate can be removed before the head is submitted. Hunters will be notified of test results within 6 weeks.
